

MAHIMA CHAUDHARY

(469) 938-0771 | mahimachaudhary9411@gmail.com | linkedin.com/in/mahima-chaudhary-143826246 | Euless, TX

PROFESSIONAL SUMMARY

Software Engineer with experience building backend systems, data pipelines, real-time streaming applications, database-driven solutions, and responsive web applications using Python, SQL, Django, PostgreSQL, Apache Kafka, Angular, and Typescript. Experienced in designing ETL workflows, data models, REST APIs, analytics solutions, and reusable frontend components. Strong foundation in data engineering, backend development, frontend development, cloud technologies, and modern data platforms.

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript, TypeScript

Backend Development: Django, Django REST Framework, REST APIs, CRUD Operations

Data Engineering: ETL Pipeline, Apache Kafka, Data Modeling, Data Warehousing, Batch Processing, dbt, Streaming Pipelines

Databases: PostgreSQL, MySQL, Schema Design, Query Optimization

Data & Analytics: Pandas, NumPy, Matplotlib, Plotly, Streamlit, Power BI

Cloud & Tools: AWS, Docker, Git, GitHub

Development Practices: Agile/Scrum, Code Reviews, Testing, Deployment

Core Strengths: Teamwork, Communication, Problem-Solving, Time Management, Adaptability

PROFESSIONAL EXPERIENCE

CodeQuant Tech. Pvt. Ltd.

Sanepa, Lalitpur, Nepal

Backend Developer

Aug 2024 – Nov 2025

- Developed scalable RESTful APIs with Django REST Framework to support core web and client-facing applications.
- Designed PostgreSQL schemas and complex queries that preserved data integrity across business-critical application modules.
- Built Python-based data processing and reporting pipelines using Pandas, NumPy, and Matplotlib to transform raw data into actionable insights for stakeholders.
- Strengthened application security via authentication systems and third-party integrations.
- Managed Git/GitHub workflows, resolved production issues, and contributed to application deployments.
- Participated in Agile/Scrum collaboration, sprint planning, code reviews, deployments, and mentored incoming backend interns with hands-on guidance.

CodeQuant Tech. Pvt. Ltd.

Sanepa, Lalitpur, Nepal

Django Developer Intern

Jun 2024 – Jul 2024

- Developed RESTful API endpoints and implemented efficient CRUD operations with Django REST Framework and PostgreSQL.
- Collaborated with senior developers to develop and maintain backend functionality under developer mentorship.

IMS Software Pvt. Ltd.

Tripureshwor, Kathmandu, Nepal

Angular Developer

Sep 2023 – Dec 2023

- Developed responsive, high-performance web applications using Angular, TypeScript, HTML, CSS, and Bootstrap.
- Built reusable and interactive UI components that elevated consistency and maintainability across the application.
- Integrated frontend features with backend APIs to boost performance, partnering closely with designers and stakeholders.
- Participated in Agile development practices including sprint planning, stand-ups, testing, and code reviews using Git/GitHub.

PROJECTS

Real-Time Fraud Detection System | Python, Apache Kafka, PostgreSQL, Streamlit, Docker

- Designed an event-driven streaming pipeline using Apache Kafka to process suspicious financial transactions and detect suspicious activity in real time.
- Developed rule-based fraud detection logic and stored alerts in PostgreSQL for historical analysis.
- Built an interactive Streamlit dashboard to monitor fraud trends and high-risk transactions.
- Containerized the application with Docker to provide a reproducible development environment.

Real-Time Event Streaming Pipeline | Python, Apache Kafka, PostgreSQL, dbt, Docker, SQL

- Developed a real-time event streaming pipeline using Apache Kafka producers and consumers to process simulated user activity.
- Persisted raw event data into PostgreSQL and built dbt transformation models to create clean, analytics-ready datasets.
- Containerized Kafka, PostgreSQL, and supporting services using Docker Compose for a reproducible development environment.
- Designed a modular data pipeline with structured logging, SQL transformations, and data validation to improve reliability.

Job Market Intelligence Platform | Python, PostgreSQL, Streamlit, Plotly, Docker, Pandas

- Built a job analytics platform that collects and processes job postings into a normalized PostgreSQL database.
- Implemented automated skill extraction from job descriptions to identify in-demand technologies and hiring trends.
- Designed interactive dashboards with Streamlit and Plotly to visualize job market insights and technology demand.

Automated Weather ETL Pipeline | Python, PostgreSQL, Requests, psycpg2

- Developed an automated ETL pipeline that retrieves weather data from a public REST API and loads it into PostgreSQL.
- Designed a relational schema and implemented reliable, repeatable data loading with validation and error handling.
- Optimized the pipeline for scheduled execution by separating extraction, transformation, and loading stages.

EDUCATION

Trine University — M.S. in Information Science	2026 – 2027
London Metropolitan University — B.Sc. (Hons) in Computing	2021 – 2024

CERTIFICATIONS

AWS Academy Training: Cloud Foundations (2026), Cloud Developing (2026), Data Analytics (2022)	
Great Learning Academy: Data Science with Python (2023)	
LinkedIn Learning: SQL for Data Analysis (2023), Data Analytics Foundations (2023)
